Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

This application contains claims 7-14 which are drawn to nonelected inventions as noted on the record.

Applicant questioned why claims 7-11 are not being considered and this is because they were non-elected as per the election of species requirement.

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1-6, 15-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Bay et al., WO 00/59863, Leone-Bay et al. '536 or Leone-Bay et al. '647 taken with GB 2295966 or WO 0057857, and Purkaystha et al. or EP 438147.

The references each teach 5-CNAC, salmon calcitonin or crosopovidone individually in the art. It would have been obvious to use the combination of them together in one composition since they are known individually in the art to be used for the same purpose, namely, for therapeutic purposes.

It is well known that it is *prima facie* obvious to combine two or more ingredients each of which is taught by the prior art to be useful for the same purpose in order to form a third composition which is useful for the same purpose. The idea for combining them flows logically from their having been used individually in the prior art. *In re Sussman*, 1943 C.D. 518; *In re Pinten*, 459 F.2d 1053, 173 USPQ 801 (CCPA 1972); *In re Susi*, 58 CCPA 1074, 1079-80; 440 F.2d 442, 445; 169 USPQ 423, 426 (1971); *In re Crockett*, 47 CCPA 1018, 1020-21; 279 F.2d 274, 276-277; 126 USPQ 186, 188 (1960).

Applicant has argued that one of ordinary skill in the art could not have predicted the alleged properties of the invention, but this is not well taken. The case law above is clear that the combination of two or more elements which are known individually in the prior art to be used for the same purpose is *prima facie* obvious.

The rejection was not made by "picking and choosing" elements from the prior art as applicant alleges. In fact, applicant's claims use "comprising" which allows for other elements to be in the references.

To use the amounts claimed by applicant is simply the choice of the artisan in an effort to optimize the results. Further, the claimed ranges are so broad on their face.

Applicant argues that the salmon calcitonin with the crosopodidone provides unexpected results but the claims are not commensurate in scope with these results.
